

# ADAM FUHRIMAN

DevOps Engineer

---

## PROFESSIONAL SUMMARY

Dynamic technology practitioner with extensive expertise in CI/CD, Infrastructure as Code (IaC), GitOps, Kubernetes, and large-scale AWS implementations. Proven track record of driving innovation and enhancing operational efficiency through strategic cross-functional collaboration, ensuring seamless integration of complex systems. Committed to leveraging cutting-edge technologies to optimize workflows and deliver impactful solutions. Passionate about fostering a culture of continuous improvement and adaptability in fast-paced environments.

---

## SKILLS

Kubernetes/Helm	Terraform/Terragrunt
AWS	GitHub Actions
Grafana/Datadog	Python
Bash	ArgoCD
Incident response management	Claude Code

---

## EXPERIENCE

### DEVOPS ENGINEER 11/2021 to 11/2025

**MasterControl**, Salt Lake City, UT

- Built and automated infrastructure deployments by implementing Atlantis, dramatically reducing Terraform wait times from minutes to seconds, significantly enhancing productivity and accelerating development cycles
- Led numerous optimization/refactor projects for internal Terraform/Terragrunt modules (EKS, RDS, IAM) that simplified codebase and cut operational costs by over \$100k/month
- Built a PoC for an Internal Developer Portal using Backstage that clearly defined ownership of applications and provided an automated, self-service tool for dev teams, that allowed less intervention from the Platform team to complete tasks.
- Coordinated Kubernetes-hosted applications using ArgoCD and Helm 150+ microservices across several regions and environments, facilitating streamlined deployment, scaling, and management within dynamic containerized environments.
- Assisted DevEx team in maintaining CI/CD pipelines and version control systems which cut lead times from a monthly cadence to weekly releases
- Implemented Grafana dashboards and alerting to monitor SLI/SLA metrics to ensure targets were being met, resulting in improved reliability and faster incident response times.

### DEVOPS ENGINEER 04/2020 to 11/2021

**ACD Direct**, Ogden, UT

- Led a company-wide DevOps transformation during a period of rapid growth and built CI/CD pipelines with Jenkins which automated a previously manual process.
- Saved \$1500/mo by identifying wasteful user licenses and reduced onboarding times from days to hours by integrating SSO.

### IT SUPPORT SPECIALIST 09/2018 to 04/2020

**ACD Direct**, Ogden, UT

- Onboarded employees and provisioned computer hardware (e.g. laptops) for employee usage. Performed software and security updates across virtual machines and analyzed performance metrics. Supported software teams with code deployment and database changes to production.
- Cut monthly software spending costs by \$2000/mo by migrating organization of over 100 employees, into a unified platform.

**TECH SUPPORT (T4)** 11/2015 to 09/2018

**Vivint Smart Home**, Logan, UT

**NETWORK OPERATIONS** 01/2014 to 09/2015

**Prismview**, Logan, UT

**AUTOTECH LEAD** 09/2009 to 01/2015

**Best Buy**, Logan, UT

---

## **EDUCATION**

**Utah State University**, Logan, UT

**Associate of Science**, Electrical Engineering, 06/2017
